

Mikhail Savushkin

Full-Stack Engineer • Next.js, React & AI

I don't just write code — I ship web apps and AI systems that kill real bottlenecks. Full-stack engineer with a Data Science background from Yandex.

📍 Istanbul, Türkiye | ✉ savushkinwork@gmail.com | 🔗 [linkedin.com/in/mikhail-savushkin-993a33408](https://www.linkedin.com/in/mikhail-savushkin-993a33408)

© Current focus: Next.js products, Supabase, LLM integrations

Experience

Full-Stack Engineer (Web & AI)

May 2026 – Present

International Plus / Power International • Istanbul

- › Built Tamam, the clinic's request and approval app (Next.js, Supabase), now in pilot with the sales teams.
- › Built a CV screening assistant that helps HR shortlist candidates for multilingual sales roles.
- › Architected an AI-driven QA agent for WhatsApp sales: LLMs connected via webhooks to automate sales analysis.

Medical Advisor

Dec 2025 – May 2026

International Plus • Istanbul

- › Managed CRM workflows and client interactions across live sales processes.
- › Turned operational knowledge into sharper requirements for AI-driven QA bots.

Data Scientist

Sep 2022 – Sep 2023

Yandex • Moscow

- › Built and maintained data pipelines for cleaning large-scale datasets.
- › Developed analytical models that surfaced insights for business decisions.
- › Cross-functional delivery. Stack: Python, Pandas, SQL, data visualization.

Education

Istanbul Topkapı University

B.Eng., Computer Engineering

Oct 2023 – Aug 2028 • in progress

Projects

Tamam

In pilot

Request and approval app for a clinic's sales teams: one queue per role instead of WhatsApp threads. 5 roles enforced by Postgres row-level security and covered by pgTAP tests; 4 UI languages including Arabic (RTL).

- Next.js
- Supabase
- Postgres RLS
- Vercel

CV Screening

MVP demo

Hiring assistant for HR: reads PDF, DOCX and scanned CVs, strips personal data before the LLM, and rates every criterion with a quote from the CV. The ranking is computed in code; HR makes every decision.

- Next.js
- Claude API
- Ollama
- OCR

WhatsApp QA Agent

In production

LLM reviewer for sales chats: webhooks pull conversations, the model extracts sales signals and returns audit-ready feedback for managers.

- LLM APIs
- Webhooks
- Node.js

Skills

FRONTEND

- TypeScript
- React
- Next.js
- Tailwind CSS
- shadcn/ui

AI / LLM

- LLM APIs
- AI agents
- Local LLMs

CLOUD

- Vercel
- AWS

BACKEND

- Node.js
- PostgreSQL
- Supabase
- REST APIs
- Webhooks

DATA

- Python
- Pandas
- SQL
- Data pipelines
